

Top 5 Suites in Attics

Also known as the *Chambre de bonne*, it was historically used and designed as a separate room at bourgeois apartments where domestic employees would sleep and rest. Because of its typical slanted ceiling and reduced space, it was considered to provide minimal confort.

As time went by, these were suddenly being rented for cheap as separate apartments, usually occupied by artists and writers from *la boheme*, or simply esteemed as the "good-for-everything" room.

From cheap and low-comfort, to extra cozy and full of character, they are the perfect temporary accomodation for savvy travelers. Mostly part of beautifully aged metropolitan buildings, they also provide a sense of belonging to the city itself.

Transforming a tight space into comfortable and full of light suites can be a great challenge, but with amazing interior design and clever use of space, a perfect balance is achieved between the old and the new. Guests can feel at home and hip at the same time, like contemporary versions of the parisian creatives.

Explore our top 5 selection of suites in attics and get inspired by their unique solutions!

"We are very happy with the TOPHOTELDESIGN platform – it's a great database of hotel and resort projects worldwide and we've seen tremendous interest and response to our own projects which have even been featured in their newsletters. Happy to be part of this growing hospitality community".

> Su Seam Teo Partner at LTW Designworks

In the when two reasons the transition in the second as Head of Interior Design. At that time, I learned to appreciate the wonderful TOPHOTELWORLDTOUR Events and the valuable contacts that could be made there. Rolf is and has been a key player in the industry, with a wonderful sense for the right people, interesting opportunities and trends in the market.

JOHNMENDIN FOLLOTELL NOJECTS JIN

His latest project - TOPHOTELDESIGN - is a great tool that gives particularly designers and owners access to firstclass photos of realised projects. I look forward to future collaborations and wish him all the best for the new joint venture with Sleeper Editorial".

"TOPHOTELDESIGN not only gives us the option to promote our brand and connect the TUUCI name to all high-end hospitality projects we completed - it also has the extremely powerful function of connecting all of the involved parties of a project in a very unstrained and visual way. It's an ideal platform for creating brand awareness, interest, and future conversations if you look at it from a supplier's perspective".

Jochem Borremans

Marketing Manager, Tuuci
